Sort Order	<input type="text" value="1"/>	

In this example a promotion of the Meetup Group is the Title Text with some descriptive information and a Meetup logo stored in the file manager with a link to the café Scientifique Talk and Debate on the Meetup site.

You should use the teaser to highlight important events on your site or to your members, for example a business show for your business sector.

The teaser will always appear above an advert if there is one for the teaser space.

If you are placing an image on the webpage, make sure the image is stored in the file manager. When you have done this click on the highlighted image and your browser will display the image, in the browser address here is the image url. Enter this into the teaser text box.
